

1 Background

Standard MkDocs/Python Markdown admonitions work

Collapsible admonitions work too

You can generate embed graphics using latex (assumed to be tikz), and provide an alt-text for accessibility.

2 Slideshows

Frame Title

Frame contents go here

Displayed when advanced

Exercise 1.

You can put exercises between frames

Answer (Exercise 1.

And you can put answers too.

Answers are **excluded** from handout mode

..... ☐

You can put the next frame here

2.1 Sample Worksheet

You can also make a worksheet with spaces

Exercise 2.

A first problem

Answer (Exercise 2.

Answer to first question

..... ☐

Exercise 3.

Another exercise

Answer (Exercise 3.

Answer to second question

..... ☐

Exercise 4.

Exercise on next page

2.2 Gradescope Worksheet

Assignment:

Name:

1. heres a question

1. here's another

3 Mathematics environments

Definition 1. Definitions work

Theorem 2. *Theorems too*

Currently supported environments are hardcoded into the template, particularly for latex output. Eventually there should be a more dynamic solution.
